

College Town and Ashley Auburn Pointe Atlanta, GA

IBG and Radiance Solar partnered to install PV systems at two new Atlanta developments, Auburn Pointe and College Town.

Since 2007, IBG has been at the forefront of green - or sustainable -building. All of their projects since then have been Energy Star rated, and all projects currently under construction are designed and budgeted for either EarthCraft or LEED certifications. They are also leaders in the application of alternative energy sources, such as solar and geothermal in the multifamily market.

The Auburn Pointe photovoltaic system is comprised of 48 state-of-the-art SunPower modules, supplied by SunPower. The 10.3 kW system is designed for durability and longevity, carrying a warranty for 25 years by the manufacturer.

The College Town system is sized at 10 kW and uses 46 SunPower 215W panels. Both the College Town and Auburn Pointe systems demonstrate IBG's commitment to constructing buildings with a reduced environmental impact and investment in renewable energy.
